

Camera Waterproofing Kit

Price: \$20 including priority mail shipping.

See page 2 for the Amazon shopping list and page 3 for a completed camera mounted to an ROV.

There is not a lot in this kit. You are best off buying the majority of the materials on Amazon and just buying the hard to find materials from us. This kit includes: two acrylic tubes, 2 camera tube mounts, 2 acrylic disks and a bunch of sticks to help stabilize the video cable in the waterproofing process. Why 2 of everything? The cost difference between waterproofing 1 or 2 cameras is not that great. This way you have a backup in case one camera fails.

The complete waterproofing instructions can be found here <http://www.marinetech.org/files/marine/files/Curriculum/PufferFish/Day%203/waterproofing%20a%20camera%20V3.pdf>

See sample Amazon shopping list on the next page.

Example of a camera mounted to an ROV using the camera mount. You will need to use a few wraps of electrical tape to get a snug fit as shown below with the blue tape.

Dry boxes make wonderful holders for the camera system if you do not have a convenient place to mount the monitor. The cable and camera will also fit nicely into the box.

This box is made by Seahorse cases model # CE-120
