INDEX

A

A-frames, 54-55, 627 ABS (acrylonitrile-butadiene-styrene), 183, 722 absolute pressure, 212-13, 717 absorbed glass mat (AGM) batteries, 414-15 accumulators, 540 acetal (Delrin®), 184, 187, 722 acoustic doppler current profiler (ADCP), 564 acoustic doppler navigation, 564 acoustics, 42, 124, 141-42, 564, 721 See also sonar acrylic (Plexiglas®), 184, 187, 224, 722 active sonar, 28 actuators, 536-37, 572 adaptive feedback control, 523-24 Adelaar, 532 advanced control systems. See control systems, advanced Advanced Submarine Rescue Vehicles (ASRVs), 39 Aigrette, 362 air air-comped thrusters, 241, 242 breathing pressurized air (in scuba diving), 21-22 compressibility, 209, 283-86 pressure/volume relationship (Boyle's Law), 283-86 airlocks, 26 Alligator, 26 alloys as structural materials, 178 alternating current (AC), 387-88 Aluminaut, 32, 33, 139, 179, 207 aluminum as structural material, 179, 180, 181, 187, 192, 200-201, 224, 722 Alvin (submersible) active ballast system, 293 built during Cold War, 207 communication through thermoclines, 153 creation and operations, 575-77 deep sea exploration, 7, 10, 31-32 high-temperature probe, 563 locating Titanic, 10, 37, 577 recovery of hydrogen bomb, 33, 576 safety check, 611 used in Project FAMOUS, 136, 575, 576 American Bureau of Shipping, 250 American Diver, 26 American Society of Naval Engineers (ASNE), 47 American Wire Gauge (AWG) standard, 421 analog data transmission, 491-92 analog-to-digital (A/D) conversion, 498-99 anchors and anchoring, 621-23 ANGUS ROVs, 34 ANGUS tow sled, 557 anodes, in galvanic corrosion, 190-91 anodes, sacrificial, 193 anodization, 192-93 aphotic zone, 152 Applied Physics Laboratory, University of Washington, 36

UNDERWATER ROBOTICS

Aquatech, 44 arc welding cutters, 550 archaeology, 44 Archerfish, 567 Archimède, 136 Archimedes' Principle, 254-55, 297, 718 Argo CTD floats, 127 Argo/Jason hybrid system, 37 Argo tow sled, 7, 13, 557 Argonaut Jr, Argonaut, Argonaut II, 95, 302-3, 317, 532,636 Armstrong, Neil, 636 Arthropod 600, 317 ASCII characters, 493-94 Asherah, 32 assembly drawings, 111, 112 Association for Unmanned Vehicle Systems International (AUVSI), 46, 47, 415 Association of Diving Contractors International (ADCI), 47 asynchronous data transmission, 496 Atlantis and Atlantis II, 576-77 Atlantis tourist submarines, 9 atm (one atmosphere of pressure), 209, 213 Atmel, 486 atmospheric diving suits (ADSs), 7, 8, 10, 11, 551 atmospheric pressure, 209-10, 213 Auguste Piccard, 45, 249 autonomous legged underwater vehicles (ALUVs), 567 autonomous underwater vehicles (AUVs) challenge (beyond SeaMATE), 704-6 description, 14-16 development, 36 gliders, 7, 15, 295 power systems, 366 video cameras in, 463 Avalon (DSRV-2), 558, 596 AVR microcontrollers, 486 Ayers, Joseph, 165

Aqua-Lung, 3-4, 21

Aquarius underwater laboratory, 23

B

Baker, Ed, 564 Ballard, Bob, 13, 46, 557, 577, 600 ballast active (dynamic), 78, 282-83, 289-95 air under pressure, 283-86 definition, 282 historic systems, 283 hybrid systems, 293, 294-95 for SeaMATE, 652-53, 660-63, 696 stability and, 252 system for Trieste, 290 tips for ballasting, 295-96, 297 trim tanks, 291 See also ballast systems, static; weights (ballast) ballast systems, static adding weight vs. floats, 259 description, 78, 282, 297 flotation, 286-88, 661 placement of weights and flotation, 253, 274, 276, 297-98 in submersibles, 293 weights, 288-89 "bang-bang" feedback control, 523, 682 bar (pressure measurement), 214

bar stock, 199 barometers, 212, 214, 215 Barrow, Mike, 11 Barrows, Frank, 641 Barton, Otis, 30, 159, 532 BASIC Stamp microcontrollers, 486, 487 Bass, George, 44 bathyscaph, 31, 159-61 bathyspheres, 7, 30, 532-33 Battelle Memorial Institute, 64 batteries AC power from, 395 advantages, 397-98 alkaline, 414 alternatives to, 418 battery charging, 406, 410 battery safety, 400-402, 406, 648 datasheets (technical information), 403 description, 398-400 lead-acid (see lead-acid batteries) lithium, 416-17, 418 marine batteries, 410 nickel metal hydride/nickel-cadmium, 415-16 primary vs. secondary batteries, 399, 405-6 sealed lead-acid, 414-15 series and parallel combinations, 412-13 types of batteries, 413-17 voltage sensor, 506 See also batteries, performance characteristics batteries, performance characteristics depth of discharge, 408-10 discharge curves, 408, 409 ease of acquisition/disposal, 411, 412 energy capacity and density, 406-7 maintenance required, 411 maximum power output, 407-8 price, 411 shelf life, 411 size and shape, 410-11 temperature performance, 410 voltage, 404-5 weight, 407 Beebe, William, 30, 159, 532, 636 Bellingham, James, 229 Ben Franklin, 32, 207, 249-51 Benthos, 36 BG (distance between CB and CG), 278-79 See also center of buoyancy (CB) and of gravity (CG); stability bilge pump shaft seals, 672, 673 bilge pumps, 330, 337, 670-73 binary numbers, 493 biofouling, 150 bipolar junction transistors (BJTs), 511 Black, Tracy, 383 blade of propeller, 324 blocks, 198 BlueView, 465, 573 BOB-4 circuit boards, 509 BOB-II, 126 Bohm, Harry, 47, 640, 711 Bond, George, 22, 23, 98 Bourne, William, 24, 283 Boyle's Law, 284 BP (British Petroleum), 35 Brady, Kevin, 169 brainstorming, 104 Bramah, Joseph, 537
