### Position/Project Specifics:

This position will be working on the Sacramento River Steelhead monitoring program out of Red Bluff, CA. The candidate will be required to operate and maintain screw-traps on tributaries to the Upper Sacramento River. Additional duties will include: PIT tagging juvenile salmonids, constructing PIT tag antennas and arrays and resistance board weirs, and data entry. On occasion the candidate may also be required to participate in snorkel surveys on tributaries as well as the main stem Upper Sacramento River. Knowledge of salmon and steelhead life histories is highly desirable. Screw Trap and PIT tagging experience would be beneficial as well.

**\*\* This position requires a valid driver's license and all offers of employment will be contingent upon passing a driving record check. \*\***

### Essential Functions:

- Participate in survey crews that conduct regional fishery presence/absence research, recreational/commercial fishing surveys, anadromous fish escapement surveys (carcass, redd, trap/weir, snorkel, etc.), or tag detection and mark recovery surveys. Make standardized observations such as species identification, length, weight, behavior, growth, survival, reproductive condition, and/or signs of parasites, diseases or pathogens, fin clips or tags.
- Collect and organize biological and habitat samples and collections (such as scales, otoliths, ageing structures, other tissues, water quality, etc.).
- Summarize and input biological or habitat data on field forms, electronic data loggers, and/or desktop computers. May assist with preliminary data summaries and analyses, technical report writing, or database management.
