

## PACIFIC STATES MARINE FISHERIES COMMISSION POSITION DESCRIPTION

---

**Title:** IT-Applications Software Specialist (19-1110)

**Location:** Seattle, WA (98115)

**Anticipated Start Date:** June 3, 2019

**Position Type:** Full Year, Full Time, Salary/Exempt

**Benefits Eligible:** Yes | [www.psmfc.org/benefits](http://www.psmfc.org/benefits)

**Salary Target:** \$93,000-\$95,000/year

**Job Number:** 19-1110

**How to Apply:** Online at [www.psmfc.org/careers](http://www.psmfc.org/careers)

**Closing Date:** May 1, 2019

### Group Definition:

Applications Software Specialists design, document, develop, modify, test and implement new or existing systems and applications software. Functions include analyzing and refining systems requirements; translating requirements into applications; writing, debugging and maintaining code; determining output media/formats; designing user interfaces; working with customers to test applications; assuring software and systems quality and functionality; writing and maintaining program documentation.

### Position Specifics:

This position will be to join a cadre of Oracle Application developers at the Alaska Fisheries Science Center in Seattle, Washington, developing advanced application systems and data modeling in a collaborative team and project based environment. The opportunity for additional project opportunities may become available. The project tasking will entail data modeling on Oracle databases, APEX application development, and development of Java and Java Script libraries. The mission of the North Pacific Halibut and Groundfish Observer program is to provide the scientists and fisheries managers with fishery catch and effort statistics, biological specimens and other data enabling modeling of target fishery populations and the efficient and effective prosecution of commercial fisheries in the North Pacific.

**Essential Functions:** (The functions listed are characteristic of the type and level of work associated with this group and pay band. They are not all-inclusive. Individual positions may perform some or all, as well as other similar work.)

- Define and analyze technical and functional requirements and specifications. Assure they are consistent with current and planned infrastructure and data environments.
- Develop software components, data flow, relationship and other models and the data structures to implement the models.
- Develop code, test, debug, document, write user instructions, and deploy systems software and application software.

## PACIFIC STATES MARINE FISHERIES COMMISSION POSITION DESCRIPTION

---

- Develop web-based application interfaces to databases. This includes development of graphical user web-based interface and stored database rules and procedures.
- Maintain engineering control processes as a mechanism for software modifications. The process provides capabilities to solicit input from users, prioritize major and minor bugs and software enhancement requests, and the ability to track these changes from the time they are reported to the time they are implemented in production code.

### **Knowledge Required by the Position:**

At the lower end of the range, the employee has broad knowledge, abilities, and skills as follows:

- Ability to analyze, design, test, and implement complex, personal computer based, real-time, data acquisition system software.
- Ability to develop complex software applications.
- Ability to create entity relationship models, process data flow models.
- Knowledge of relational database management systems and structured query language.
- Knowledge of effective technical writing techniques.
- Ability to communicate clearly and effectively, both orally and in writing.
- Strong writing of documentation and presentation skills.
- Ability to interact and deal effectively with individuals and groups having diverse backgrounds (biologists, engineers, statisticians, economists, fiscal specialists, computer specialists, etc.) to translate their needs to software functionality.
- Database modeling and design.

At the upper end of the range, the employee uses mastery-level knowledge and abilities to develop state-of-the-art technology and functionality.

### **Physical Demands:**

#### **Physical Demands:**

The work is sedentary with moderate walking between workstations and carrying folders, reports, and similar light loads.

#### **Work Environment:**

The work is performed in an office setting with adequate lighting, heating and ventilation. There are the normal risks of an office environment.

#### **Minimum Qualification Requirements:**

Candidates must present one year of Specialized Experience\*\*\*which demonstrates:

## PACIFIC STATES MARINE FISHERIES COMMISSION POSITION DESCRIPTION

---

- Knowledge of the customary approaches, techniques, and requirements appropriate to systems and applications software design and development;
- Knowledge of planning sequences necessary to accomplish assignments where this entailed coordination with others outside the organizational unit and development of project controls; **and**
- Adaptation of guidelines or precedents to the needs of the assignment.

\*\*\*The Specialized Experience must equip the candidate with the particular knowledge, skills, and abilities to perform successfully the duties of the position, and is typically in or related to the work of the position to be filled. To be creditable, the Specialized Experience must have been equivalent to at least the next lower level in the normal line of progression position.

### **Additional Requirements Include:**

- Knowledge of Oracle Application Express (APEX) with Oracle Procedural Language/Structured Query Language (PL/SQL), JAVA, JavaScript, extensible Markup Language (XML), Dynamic Actions, and Plug-Ins
- Knowledge of Use Case, ERD (Entity Relationship Diagrams) and other logical and physical modeling tools (Oracle Designer, Oracle Developer, Oracle SQL Developer)
- Knowledge of generally accepted application development life cycle and metadata standards and processes, including the creation and publication of FGDC or ISO metadata records.
