Carry out your own PhD project!
– in Deep Sea Research / Geomicrobiology –
supervised by Prof. Antje Boetius (University of Bremen / Max Planck Institute for Marine Microbiology / Alfred Wegener Institute)

The Hector Fellow Academy offers you the opportunity to realize a self-developed research project under supervision Prof. Antje Boetius. She is one of the Hector Fellows, a community of outstanding professors from different research institutions across Germany working in STEM-subjects, medicine, and psychology.

As an internationally recognized deep-sea researcher, she explores the diversity and biogeochemistry of the ocean, including its polar regions. She is interested in interactions between geo- and biosphere and develops deep-sea technologies used to monitor the ocean environment.

Your profile
You are enthusiastic about developing and investigating an innovative research idea within the discipline of Prof. Boetius.
You have a master’s degree in a scientific or engineering subject with excellent grades.

Our offer
✓ Opportunity to realize a self-developed research idea
✓ Mentored by an internationally renowned, top-level scientist
✓ Funded position (according to TV-L 13, up to 100%, based on the funding rates of the DFG for PhD students)
✓ Extensive research funding
✓ Membership in an excellent research network
✓ Additional management courses, trainings & networking events

Your application
Apply until March 31st, 2021 via our Application Portal.
