HIRING OCEANOGRAPHERS AND GEOLOGISTS

www.boem.gov/employment

Looking for new talent to join our D.C. Metro Area team that manages marine minerals, promotes responsible stewardship, and ensures environmental protection. Part of the U.S. Department of the Interior, we manage billions of acres of the U.S. outer continental shelf. We oversee resource mapping and evaluation, mineral leasing and policy development, environmental assessment and study, and stakeholder engagement – all to promote coastal resilience and a sustainable future.

Impact make an impact make an impact make an im

- Develop policy for the exploration, leasing, and stewardship of marine minerals
- Advance BOEM's National Offshore Sand Inventory and Marine Minerals Information System
 - Coordinate use of minerals in coastal restoration projects
- Evaluate minerals using geophysical, geological, and geospatial methods and data
 - Participate in and manage research projects
 - Engage stakeholders and build new partnerships
